46% of respondents reported increased on-campus opportunities for internships for Specialized Masters students, compared with 53% seeing an increase in the Fall 2015 survey.

MBA Career Services & Employer Alliance, March 2017
27% of respondents said internship opportunities for International Specialized Masters students increased, compared with 13% seeing an increase in the Fall 2015 survey.

*Defined as students who do not have permanent work authorization in the country or region where the school is located.

MBA Career Services & Employer Alliance, March 2017
The biggest increases for internship recruiting for Specialized Masters programs were Financial Services and Technology.
Schools provided the following information to help frame the survey results:

- Recruiters are increasingly looking for candidates that combine business acumen and a technical background.
- Many schools are seeing a decrease in on-campus recruiting, with more companies focusing on job postings and virtual recruitment.
- After many years of moderate to high growth in recruiting since the recession, recruiting seems to have flattened out to a more stable pace.
Many U.S.-based schools commented on challenges regarding International student hiring:

- The number of opportunities for students requiring sponsorship continues to diminish.
- Many companies are more hesitant to consider international students.
- Companies are continuing to revise their policies on considering international candidates.
- There is increased uncertainty surrounding Visa policies (particularly in the U.S.) due to recent government programs.
